

Columbia Green promotes beautification of the Columbia area through landscaping, gardening, horticulture, education and conservation. Making Columbia more beautiful will enhance the quality of life for its citizens and visitors and will support economic development.

Columbia Green also hosts educational events every year to expose our members and other interested residents to new gardening techniques and ideas. In this vein, we have held workshops on many different aspects of gardening, such as pruning techniques and utilizing containers. Additionally, we host an annual garden tour every May, showcasing outstanding private gardens throughout the metropolitan area.

Columbia Green is dedicated to beautifying our city, which we believe will have a domino effect at improving life for all our residents.
